CONTACT NO : +63 9536342312 EMAIL : raymundnotarion02@gmail.com

PROFILE SUMMARY

Detail-oriented Computer Science graduate with experience in web development, database management, and digital system development. Skilled in building and maintaining web applications, managing data workflows, and utilizing cloud-based and AI-powered tools to improve efficiency. Adaptable and committed to delivering reliable, high-quality solutions through problem-solving, collaboration, and continuous learning.

WORK EXPERIENCE

DSWD - Dept. of Social Welfare and Development

OJT

Full-Stack Developer

- Developed a real-time data synchronization system during on-the-job training (OJT) to extract and transfer Excel data to shared spreadsheets, streamlining data management processes and improving workflow efficiency for employees.
- Automated reporting workflows by integrating spreadsheet functionalities, reducing manual data entry tasks and improving the accuracy and consistency of reports.
- Enhanced operational efficiency by streamlining data handling procedures, resulting in faster report generation and better support for decision-making and program monitoring.

Alchemy RPG

SEPT 2025 - FEB 2026

Data Entry

- Managed and organized game data, player information, and NPC records using a Markdown-based documentation system, ensuring accurate data structuring and consistent formatting across records.
 - Maintained data integrity by reviewing, updating, and standardizing game-related information, reducing inconsistencies and improving accessibility for team reference.
 - Optimized documentation workflows by structuring digital records in a clear and efficient format, supporting smoother data management and faster information retrieval for development processes.
-

TECHNICAL PROJECTS

Excel Reader System

Laravel | PHP | MySQL | JavaScript | Spreadsheet Integration

- Developed an Excel data extraction and synchronization system during On-the-Job Training to automate data transfer and improve employee workflow efficiency.
- Designed and implemented backend processes using Laravel and MySQL to manage, process, and store extracted spreadsheet data.
- Integrated spreadsheet connectivity and JavaScript functionality to enable real-time data updates and reduce manual encoding tasks.

PUCU Library Management System

PHP | Laravel | Kotlin | Firebase | Android Studio | RFID Integration

- Developed a web and mobile-based library management system for a school library, integrating RFID technology to automate book transactions and improve library operations.
 - Designed an Android mobile application that allows students to borrow, reserve, renew, and check book availability, enhancing accessibility and user experience.
 - Built a Laravel-based web dashboard for librarians to manage book inventory, monitor transactions, and track library activities through RFID-enabled automation.
-

EDUCATION

PHINMA UPang College of Urdaneta

2022 - 2026

Bachelor of Science in Computer Science

TECHNICAL SKILL

Languages & Tools: PHP, Laravel, CakePHP, JavaScript, AngularJS, HTML/CSS, MySQL, Kotlin, Firebase, Git, GitHub, Visual Studio Code, GitHub Copilot, ChatGPT, Claude, Figma, Canva, Android Studio, Microsoft Office, Google Workspace

Core Competencies: Software Development, Web Development, Mobile App Development, Database Management, System Analysis, AI-Assisted Workflows, Workflow Automation, Data Management, UI/UX Design, Troubleshooting, Problem-Solving, Project Coordination

Soft Skills: Fast Learner, Adaptable, Detail-Oriented, Strong Problem-Solving, Effective Communication, Team Collaboration, Time Management, Deadline-Oriented, Strong Written English, Self-Motivated
